Anton Sergeevich Prokhorov

Target Positions - DevOps Engineer | Data Engineer

Contact Information

- Email: tessaxmail@gmail.com

- Phone: +998(91)006-97-80 / WhatsApp

- Telegram: @Ant0n_Prokhorov

- City: Tashkent

- Ready for relocation and business trips

Engineer with experience in developing and implementing ML infrastructure, building data pipelines, and microservice architectures.

Project Experience

ML Infrastructure Projects (2024 - present) DevOps

- Design and deployment of microservice architecture

- Setup and optimization of infrastructure for high-performance GPU computing

- Configuration of JupyterHub with Docker integration for user environments

- Setup and optimization of databases (MongoDB, PostgreSQL)

- Creation of solutions for storage and analysis of ML model experimental data

- Development of ETL processes for collecting and analyzing training and testing metrics

- Implementation of monitoring systems based on Grafana/Prometheus for resource tracking

- Deployment and support of logging systems for ML components

- Development of backup and recovery systems with encryption

- Automation of deployment and update processes

- CI/CD integration based on GitLab

Work Experience

MICROS PAK JV LLC (2023-2025) Sales Department Head

- Supervision of marketing strategies, monitoring Google, Yandex, Instagram reporting

- Analysis of market data and trends, formation of development strategy

- Management of international projects

- Development of analytical reporting and forecasting systems

- Implementation and optimization of CRM systems
- Coordination of cross-functional teams, including marketing, SMM, development, and production departments

PJSC "Rosneft Oil Company" (2015-2022) Acting Head of Technological Unit

Individual Entrepreneur (2012-2015)

- Creation and management of an advertising business from scratch: organization of business processes, customer relations, interaction with contractors, production control
- Execution of design projects and development of advertising materials for corporate clients

LLC "Photo" (2007-2011) Photographer/Editor

Professional Skills

Development and Programming Languages:

- Python, Bash scripting, REST API, process automation

Infrastructure and Containerization:

- Docker, Docker Compose, Kubernetes, CI/CD (GitLab/Github), Linux

Databases and Data Storage:

- PostgreSQL, Qdrant, ClickHouse, Hadoop

ML Infrastructure and Orchestration:

- Airflow, Kubeflow, ETL processes, big data handling

Monitoring and Logging:

- Grafana, Prometheus, ELK Stack

Development Tools:

- Git, DBeaver, version control systems

Education

Educational Platform LLC "1T" (2024) Program: "Data Architect (DevOps)"

- Specialization: Big data technologies and architecture

Samara State Technical University (2016-2023) Faculty: Oil and Gas Engineering

- Specialization: Oil and Gas Processing (incomplete higher education)

Novokuibyshevsk Petrochemical Technical School (2008-2011) Specialization: Repair and Operation of Oil Refining Equipment

Additional Education

Manual Testing Course (QA) (2022)

- Development of test cases and test documentation

- Work with bug trackers

- Testing techniques

- Quality assurance basics

Languages

- Russian: native

- Ukrainian: conversational

- Polish: elementary (A2), everyday communication

- English: elementary (A2), reading technical documentation
